

PBO400RN40

The PBO400RN40 is a 400mm retrofit handle with a holding force of 400kg. This is a new architectural handle which ensures high security electromagnetic locking without any reduction for retrofit to existing doors.

The BO Series is a new profiled architectural handle, which ensures high security electromagnetic locking without any reduction in door width or height. The new design allows for fast installation and is ideal for retrofit to existing doors.

It offers a greater holding force, as multiple electromagnetic locks can be used - increasing the security and strength of the locking.

Overview

- NF S 61-937
- Ultra-quick installation
- 400mm handle
- Pre-drilled sections (adjustable)
- Width overlapping the previous installations
- Terminal block

PBO400RN40 - Technical Specifications

Product Specifications

Holding force: 400kg

Electrical Specifications

Operating voltage: 12V to 24Vdc

Current: @12Vdc = 550mA, @24Vdc = 275mA

Dimensions

Dimensions: 400 x 126 x 68mm
